What's topdowm appoach and how to apply it?

Mind Map topdiwn approach

What's topdown approach?

01

Simple terms, a top-down approach is an investment strategy that selects various sectors or industries and tries to achieve a balance in an investment portfolio

02

The top-down approach analyzes the risk by aggregating the impact of internal failuoperationalres.

03

It measures the variances in the economic variables that are not explained by external macroeconomic factors. As such, this approach is simple and not data-intensive.

04

The top-down approach relies mainly on historical data. This approach is opposite to the bottom-up approach.

What's topdowm appoach and how to apply it?
When to Use the Top-Down Approach?

01 The problem is complex and needs to be broken down into smaller, manageable parts.

02 There is a need to understand the big picture before diving into details.

03 A clear understanding of the end goal is required before starting the project.

04 The solution can be divided into smaller subproblems that can be solved independently.

The problem has multiple potential solutions, and a top-down approach can help prioritize and evaluate them

Topic
What's topdowm appoach and how to apply it?
Advantages and Disadvantages topdown appoach

Advantages:

- Easy to understand and implement.

- Provides clear objectives and expectations.

- Supports effective allocation of resources.

01

02

03

04

05

06

Disadvantages:

- Inflexible to change

- Limited to pre-determined solutions .

- Can result in lower motivation and participation from lower-level employees

Apply topdowm appoach

Attention

Interest

Desire

Stage 1: Break down the method's logic into steps using comments, as shown in the

example below.

Stage 2: Generate dependent methods, classes, enums, etc., used in stage 1. For now, just generate empty dependent methods or classes and dort bother implementing

them during this stage.

Stage 3: Once you have the code skeleton, implement dependent methods one by one

and run the unit test.

Learning how to learn and learn fast

Mind map How to learn and learn fast

Learning (also known as studying, learning, or learning) is the process of acquiring new understanding, knowledge, behavior, skills, values, attitudes, and interests

The ability to learn is seen in humans and animals

What's Learning

Learning is a long process, a way for people to access knowledge and improve their qualifications

Throughout its history of development for thousands of years, humanity has accumulated a huge store of knowledge about nature and society.

That knowledge is passed down from generation to generation. If you want to absorb that knowledge, there is only one way: lifelong learning.

When do you need to learning

Learning ho to learn and learn fast

. Learning is very important, it makes us better aware of the values of life One of the most important purposes of learning. "Living together" is the ability to integrate into society, communication skills, behavior... to adapt to all living environments and complex human relationships in the process of living so as not to fall behind. lost. This is an inevitable consequence of "knowing" and "doing".

Why is it necessary to learn

When we first start learning, we may not understand it, but everything seems impossible until it is completed.

Form the habit of learning when the working environment around us has good people. Learn fr their habits and apply them to yourself.

Learning from better people makes it easier for us to make up for our shortcomings. Own

Application of learning

Learning how to learn and learn fast

What's Learning:Learning (also known as studying, learning, or learning) is the process of acquiring new understanding, knowledge, behavior, skills, values, attitudes, and interests. The ability to learn is seen in humans and animals

Why is it necessary to learn

President Nelson Mandela once said "Education is the most powerful weapon you can use to change the world." You don't need to mobilize the army to destroy a country, but attack education This shows that learning not only helps you improve your knowledge and expand your mind, but also helps you contribute less to the development of the country.

Topic: Aotonomy at work

Mindmap: Aotonomy at work

The employee"s ability to carry out their duties on their duties in their own without needing a great deal of ooutside help or supervision

What's aotonomy at work

Effective when having autonomy at work
- Promote skill development
- Develop moral qualities in employees
- Employees feel valued

Aotonomy at work

-They are highly accountable
-You trust their judgment
-Their track record is Solid
-They respect boundaries

Identify a person who is autonomy at work

Reasons to have autonomy at work

Always have a backup plan when deploying and taking action to improve risk reduction and increase the likelihood of success;

Proactive position to solve and bring results to the forefront.

Group D

How to be autonomy at work

Share vision: Department heads clearly share company values; company vision

Empowerment: giving employees manager roles

-Empowerment: giving employees manager roles
-Set goals & implementation plans: learn about employees' ideas, understand their inner thoughts and aspirations

Topic:
What's the smart question how to apply it on your daily basis/work

Mindmap What's the smart question how to apply it on your daily basis/work

Is to ask questions in a way to exploit and clarify the problem so that they will have enough information to analyze and handle the problem in the most convincing way. That is a smart question.

What's the smart question

Determine the content and purpose of the question. Have a plan for your questions. Ask questions based on the level of the relationship You need to avoid being pushy and asking too many questions at once.

Apply smart questions to work

What's the smart question

Sometimes our questions are so simple that people are not interested in answering or answering them. If we ask questions intelligently, we can quickly get feedback and solve the task more easily.

What would happen if smart questions were applied?

Intentionally:A good questioner knows that it's all in the preparation. Ask questions with purpose. Choose words with purpose and make sure you ask at the right time. Before you start asking a question, think carefully about why you're asking it.
